

Agar aapke paas retirement ke pehle ₹5 crore nahi hai, toh aapke retirement ke baad sirf 2 options hain: ya toh aap apne bachcho ka financial burden ban jaoge, ya fir 70 ki age mein bhi aapko kaam karna padega, apne survival ke liye. Aur aaj main aapko bataunga ki India mein kitne ese log hain jo is trap se bahar nikle hain, aur yeh stats itne shocking hai ki aapko apni financial strategy abhi change karni padegi.

Toh doston, main hun Ayush aur mera mission hai ki main apne saath-saath is channel ki help se 1 lakh logo ko unke first crore tak pahunchane mein help kar paun.

Toh chalo shuru karte hain ek simple question se, India mein actually kitne logo ke paas ₹5 crore ya usse zyada ka net worth hai? Matlab aapke ghar, savings, investments, sab kuch jod ke minus aapke loans.

Aur yeh number, aapko shock kar dega.

[Mercedes-Benz Hurun India Wealth Report 2025 ke according, India mein sirf 8,71,700 millionaire households hain. Matlab ese log jinki net worth ₹8.5 crore se zyada hai.](#) Ab yeh number sunke aapko lagega ki bahut hain, par kya aapko pata hai India mein total households ka number kya hai? 30 crore se bhi zada. Ab ek baar calculate karo, toh yeh sirf 0.29% banta hai. Matlab har 1000 households mein se sirf 3 ke paas ₹8.5 crore se zyada ki networth hai.

Aur ₹5 crore? Agar hum conservative estimate lein, toh approximately 0.3 se 0.5% Indians ke paas ₹5 crore ya usse zyada ka net worth hoga. Matlab agar aap 1000 logo ko jante ho, toh unmein se zada se zada 3-ya-5 log financially us level pe hain. Baaki 995? Rat race mein involved hain.

Ab thoda aur deep chalte hain in numbers mein.

Chalo break down karte hain India ki wealth distribution ko brackets mein.

Sabse pehle ₹0 se ₹1 lakh ka net worth, yahan pe bahut bada chunk hai Indian population ka.

Fir ₹1 lakh se ₹10 lakh, isme average Indian household hai, jiska average net worth hai approximately ₹9.83 lakh. Yeh woh log hain jo sochte hain ki accha chal raha hai life mein, but reality yeh hai ki inflation ko consider karo toh yeh barely surviving hain.

Fir aata hai ₹10 lakh se ₹75 lakh ka bracket. Yahan pe entry hoti hai top 10% ki. [Top 10% mein aane ke liye aapke paas minimum ₹65 lakh ka net worth hona chahiye.](#) Aur agar aap soch rahe ho ki yeh toh zyada hai, toh yaad rakho, ₹65 lakh mein agar aapka ₹50 lakh ka flat hai aur ₹40 lakh ka home loan, toh aapki actual net worth sirf ₹10 lakh hai.

Iske baad, ₹1 crore se ₹5 crore tak, jisme India ke top 5% ka aate hain. Jinka minimum net worth hota hai ₹4 crore. Yeh woh log hain jinhone actually wealth create ki hai.

Aur finally ₹5 crore plus, jiske baare mein hum baat kar rahe hain. Yeh ultra-rare hai India mein aur 0.29% mein aate hain.

Ab aapke mann mein yeh question aa raha hoga ki "Ayush bhai, maine toh suna hai bahut se log ₹50 lakh, ₹1 crore ki salary par hain. Woh log toh ₹5 crore easily cross kar jayenge na?"

Aur yahi asli trap hai. [High salary does NOT equal wealth](#). Aur yeh aap jitna jaldi samjh jao utna aapke liye hi achha hai.

Dekho, [Centrum Research ki report batati hai ki 58,000 Indians ₹5 crore se zyada ki income earn karte hain per year](#). Aur [unhi mein se kuch logon ki si kahaniyan saamne aati hain](#). Kyunki bhai, salary aur wealth mein zameen-aasman ka farak hai.

Aur ek [CA ne recently warning bhi di thi social media par aake ki](#), "People making ₹25 lakhs per annum are living paycheck to paycheck." Soch lo, ₹25 lakh salary, jo ki top 1-2% mein aati hai India mein, aur woh bhi paycheck to paycheck. Kaise?

Main batata hoon. ₹25 lakhs salary hai matlab aap Bangalore, Pune ya Mumbai jaisi city mein job kar rahe hoga, jahan pe rent hi ₹60,000-₹1,00,000 ke beech hoga. Uske baad, Car EMI ₹35,000. Restaurants, Trips, Latest phone, easily ₹30,000-₹50,000 ho jata hoga. Toh aapke paas bacha kya? Kuch nahi. Aur yeh sirf ₹25 lakh wale ki baat nahi hai, ₹50 lakh, ₹1 crore salary walo ki bhi same kahani hai. Kyunki lifestyle inflation, salary se zyada tezi se badh raha hai.

Aur retirement pe aate aate toh picture aur bhi dark ho jati hai. [EPFO ka official data dekho toh pata chalta hai ki 50% EPF members ke paas final settlement ke time ₹20,000 bhi poore nahi hote. Matlab, पूरी life kaam kiya, EPF mein paisa kata, aur end mein mila kitna ₹20,000 bhi nahi. Aur 75% members ke paas ₹50,000 se kam hai retirement pe. Aur 87% ke paas less than ₹1 lakh.](#)

Kyun? Kyunki log beech mein withdraw kar lete hain. Job change hui, emergency aayi, ghar chahiye, sab paisa nikal liya. [EPF data batata hai ki 95% members unemployment ke turant baad final settlement claim kar lete hain](#). Aur fir usme se 46% dubara EPFO-registered employer ke paas join ho jate hain. Matlab cycle tooti, compound interest gaya, pension eligibility gayi.

Aur woh log jo ese paisa nahi nikalte? Unke bhi haalaat zada acche nahi hain. [Average EPF contribution kya hai pata hai? 65% members ₹15,000 per month se kam kamate hain, yeh hai wage ceiling mandatory EPF contribution ke liye. Toh unka contribution bhi minimal rehta hai.](#)

Aur [Max Life Insurance ki ek study aayi thi jisme 90% Indians jo 50 plus age group mein hain, unhone yeh admit kiya ki unhe regret hai ki unhone pehle save nahi kiya retirement ke liye](#). 90%, soch lo, matlab aapke aas-paas abhi jitne bhi 50-60 saal ke log hain, unme se 10 mein se 9 logon ko yeh regret hai.

Ab ek aur trap hai jisme mostly Indians fase hue hain, woh hai real estate. Woh sochte hain ki ₹2 crore ka flat khareed liya toh ameer ho gaye. Jabki reality mein, net worth mein toh woh ₹2 crore count hoga, but aapke paas liquid kya hai? Kuch nahi. Emergency mein kya karoge? Flat nahi bech sakte turant. Aur agar rent pe doge, toh 2-3% yearly return milega, jo ki inflation-adjusted FD se bhi kam hai.

Aur dekho, facts yeh hain ki [India ke top 1% ke paas jo wealth hai, uska 60% sirf real estate aur gold mein locked hai](#). Yeh woh concept hai jise kehte hain "house rich, cash poor." Ultra-high-net-worth individuals ka average ownership 2.57 homes hai, aur unka 32% wealth sirf residential real estate mein hai. Illiquid. Jo woh use nahi kar sakte jab tak woh usse sell nahi kar dete.

Toh ab sawaal yeh hai ki fir log ameer kaise bante hain? Rakesh Jhunjhunwala ka naam toh aapne suna hi hoga, jinko log India ka Warren Buffett bhi kehte the, unhone ek baar bola tha, "Wealth creation by itself becomes self-sustaining once it gathers pace."

Aur agar unki hi story dekho. Toh unhone apna kaam 1985 mein start kiya sirf ₹5,000 se. Aur pehla crore banane mein unhe saalon lag gaye. Par jab ek baar critical mass create ho gaya, toh exponential growth start ho jaati hai. Aur isi ki wajah se woh ₹5,000 se ₹50,000 crore tak pohoch paaye. Par yeh overnight nahi hua. Us pehle crore tak pahunchna sabse mushkil hota hai. Aur uske baad toh compounding takeover karne lagti hai.

Par most of the Indians apne first crore tak pahunch hi nahi paate. Kyun? Kyunki woh invest hi nahi karte. [India mein 140 crore log hain, aur kitne mutual funds mein invest karte hain? Sirf 5.4 crore](#). Matlab sirf 3.9% population. Aur jo invest bhi karte hain, unka average SIP kitna hai? [₹3,200 per month. Aur ₹5 crore tak pahunchne ke liye kaafi nahi hai](#).

Jabki isse agar globally compare karo, toh [US mein around 62% log stocks mein investment](#) karte hain. [India mein yahi number sirf 5%](#). Baaki sab kahan hai? EPF mein jiski reality aapne dekh hi li, FDs mein jo inflation ke against nahi jeet-te, aur gold aur real estate mein jo illiquid hai.

Aur yeh sab kyun ho raha hai? Because we are stuck in a salaried mindset. Hum-me se zatatarr log aaj bhi single income source pe dependent hain.

Ab zara India ke wealth concentration ki reality dekho, [Top 1% control karte hain India ka 40% wealth. Top 10% ke paas hai 65%. Bottom 50%. Sirf 6%](#). Aur yeh gap buss badh hi raha hai, kam nahi ho raha.

Ab aapko yeh sab sunke depressing lag raha hoga. But dekho, main aapko reality dikha raha hoon kyunki aapko pata hona chahiye ki aap kahan stand kar rahe ho. Aur agar aapko ₹5 crore tak pahunchna hai, toh aapko yeh bhi pata hona chahiye ki abhi kitne log wahan hain aur kyun zatatarr log kabhi wahan pahunch hi nahi paate.

Toh ab kya karna chahiye? Pehle toh yeh samjho ki purane rules ab kaam nahi karte. "Save 10% of salary" yeh 1980s ka advice tha jab logon ko pension milti thi, job security thi, inflation kam thi. Ab 10% se kuch nahi hoga. Aapko minimum 20-30% save karna padega aggressively.

"Pehle ghar kharido", galat advice hai agar aap sach mein wealth creation karna chahta ho. Ghar aapko security de sakta hai, par wealth nahi. Kyunki isme aapka capital lock ho jata hai illiquid asset mein.

Aur yeh "Retirement ke liye EPF kaafi hai" iska bhi data aapne dekh hi liya hai.

Toh aapko kya karna hai? Dekho, Indian retirement ke conceptually 4 pillars hain. Pehla EPF tha, jo ab kaafi hadd tak irrelevant ho chuka hai, jaisa humne dekha. Phir, Real estate, ek illiquid trap. Social security jaise US mein hai, India mein nahi hai. Toh bacha kya? Sirf aapki khud ki savings aur investments.

Toh 50-30-20 rule ko follow karo. 50% needs pe, 30% wants pe, aur 20% apni savings aur investments mein daalo. Aur yeh 20% equity mein jaye, jisme compounding work kare, long-term mein.

Phir, iske aage aapke paas do raste hain. Slow way, yaani har increment, har bonus, har windfall ka 50% current needs mein, aur 50% future investments mein daalo. Isme thoda time lagega, but yeh sustainable hai.

Aur doosra rasta hai, fast way, yaani kaise bhi karke apni lifestyle drastically cut karo aur minimum 30% savings start karo aaj hi se.

Aur ek last reality check, zadataar log 45 ki age pe aake realize karte hain ki ab bahut late ho gaya hai. 10-15 saal bacha hai retirement tak, aur woh time kaafi nahi hota ₹5 crore+ ki wealth build karne ke liye, agar aapne pehle se start nahi kiya hai. Aur [DSP Pension Fund project kar raha hai ki India ka retirement savings gap \\$96 trillion tak pahunch jayega 2050 tak](#). Aur yeh crisis abhi se dikhna start ho gaye hain.

Toh decision aapka hai. Aap un 0.5% mein aana chahte ho jo ₹5 crore ka benchmark cross kar paate hain, ya un 99.5% mein rehna chahte ho jo retirement ke baad buss struggle aur regret karte reh jaate hain?

Toh like kariyega agar video achha aur informative laga ho toh, aur comments mein bataiyega, aap apni net worth ke hisaab se abhi koun se bracket mein aate ho. And subscribe for more investing and money-related content. Milte hain agle video mein. Until next time, stay financially wise.
